ABOUT ME

I am a second-year B-Tech Computer Science & Engineering student at IMS Engineering College with a strong interest in Artificial Intelligence, Web development, Software Development, and Data Analytics. I am currently building my foundation in Python programming, Git & GitHub, and Web Development. I enjoy solving problems, learning new technologies, and applying my skills through projects and simulations. I am eager to gain hands-on experience through internships and collaborative projects in AI, software development, and emerging technologies.

WORK EXPERIENCE

Campus Ambassador | EDC IIT Delhi (Virtual)

Jan 2026 – Feb 2026

- Promoted entrepreneurship initiatives among students through awareness campaigns.
- Coordinated event participation and student engagement activities.
- Worked with cross-functional teams to support event execution and outreach programs.
- Strengthened leadership, communication, and project coordination skills.

GenAI Powered Data Analytics Job Simulation | Tata Group (Virtual)

Feb 2026

- Completed a virtual job simulation focused on AI-powered data analytics and business problem-solving.
- Analyzed structured datasets to identify trends and generate actionable insights.
- Utilized AI tools for data interpretation and reporting.
- Presented data-driven recommendations based on business requirements.

EDUCATION & CERTIFICATIONS

B-TECH | Computer Science & Engineering | IMS Engineering College Ghaziabad | 8.5 SGPA

2025 – 2029

XII | CBSE | L.K. International School | 76%

2024 – 2025

X | CBSE | L.K. International School | 90%

2022 – 2023

PROJECTS

Age Calculator

Jun 2026.

- Built an interactive age calculator that computes exact age in years, months, and days.
- Implemented date validation and real-time calculations using JavaScript Date APIs.
- Added additional insights such as days until next birthday and age-related statistics.
- Designed a responsive and visually appealing user interface.
- Optimized calculation logic for accurate and efficient results.

Nayepankh NGO Website

Jun 2026

- Developed a fully responsive NGO website to promote social initiatives and increase volunteer engagement.
- Designed multiple sections including Home, About, Programs, Volunteer Registration, and Contact.
- Implemented mobile-first responsive design for seamless user experience across devices.
- Enhanced website accessibility and navigation through intuitive UI components.
- Optimized page layouts and performance for faster loading times.

E-Commerce Website

Apr 2026

- Developed a fully responsive e-commerce website using HTML5, CSS3, and JavaScript.
- Built product listing, product detail, shopping cart, and category navigation functionalities.
- Implemented dynamic UI interactions using DOM Manipulation and JavaScript event handling.
- Designed a mobile-first responsive interface ensuring seamless user experience across devices.
- Optimized website performance, navigation flow, and user engagement.
- Applied modern frontend development practices to create an intuitive online shopping experience.

Task Manager

Feb 2026 – Mar 2026

- Developed a task management application for organizing daily activities efficiently.
- Implemented task creation, editing, deletion, and completion tracking features.

- Utilized Local Storage API to persist user data without requiring a backend.
- Designed an intuitive and responsive user interface for improved productivity.
- Applied DOM manipulation techniques for dynamic task updates.

Password Generator

Mar 2026

- Developed a secure password generator capable of generating strong random passwords.
- Implemented customizable password options including length and character combinations.
- Enhanced security by incorporating randomization algorithms.
- Designed a responsive interface ensuring smooth user interaction across devices.
- Improved user experience through real-time password generation and copy functionality.

Notes Application

Feb 2026.

- Created a responsive note-taking application with search and note management functionality.
- Implemented features for creating, deleting, restoring, and permanently removing notes.
- Used Local Storage to maintain user data across browser sessions.
- Designed a clean and user-friendly interface focused on usability and efficiency.
- Optimized application performance through efficient JavaScript event handling.

Music Player

Dec 2025

- Developed a feature-rich web music player with playlist and playback controls.
- Implemented play, pause, next, previous, seek, and volume adjustment functionalities.
- Designed a modern dark-themed user interface with animated visual elements.
- Added search functionality for improved music navigation.
- Ensured responsive performance across multiple screen sizes.

Calculator

Nov 2025

- Built a fully functional calculator supporting arithmetic operations.
- Implemented input validation and error handling for accurate calculations.
- Designed a responsive and intuitive user interface.
- Applied event-driven programming concepts for dynamic interactions.
- Ensured cross-browser compatibility and optimized performance.

KEY SKILLS

English Proficiency | Effective Communication | Team Collaboration | Project Management | Leadership | Networking | Time Management | Analytical Thinking

TECHNICAL SKILLS

HTML5 | CSS3 | Javascript | Responsive Web Design | Frontend Development | Problem Solving | DOM Manipulation | Git | GitHub | UI Development | Debugging | C Programming | Python | Artificial intelligence | Generative AI Tools | ChatGPT | Gemini | Claude | Data Analysis | MS Excel | MS Word | MS Powerpoint | VS Code | Canva

PROJECTS

Frontend & Web Development

- Full Stack Web Development – NoviTech R&D Pvt. Ltd. (2026)
- Git & GitHub Bootcamp – LetsUpgrade (2026)
- High-Growth Tech Career as a Full Stack Developer – WsCube Tech (2026)

AI & Technology

- Prompt Engineering – Vedam School of Technology (2026)
- Gemini for Google Workshop – Simplilearn (2026)
- Artificial Intelligence for Beginners – Coursera (2025)
